Street Improvements		Grant Creek / I-90 Intersection Improvements		S-03	S-03	S-01		
<b>Description and justification of project and funding sources:</b>								
<p>The project includes widening west side of Grant Creek Road just north of the I-90 interchange. The current roadway has a single southbound lane north of the intersection with two receiving lanes south of the intersection, and the project would add capacity to Grant Creek Road by adding two additional south bound lanes north of the intersection. The final configuration would be two south bound thru lanes, bike lane and one dedicated right turn lane north of the intersection. This additional lane capacity will decrease existing queuing, congestion and delay and increase safety and operation of the entire signalized interchange along with air quality benefits from a reduction in idling vehicles. A Federal Lands Access Grant was submitted jointly by the City and Montana Department of Transportation in January, 2013 and again in 2014. This grant was not approved in either year. Design is planned to occur in FY18 with construction in FY19.</p> <p>Since the project was not funded with a grant the City of Missoula and the Montana Department of Transportation plan to partner together to complete this project.</p>
