Department Goal	Extend lifespan and use of equipment.			

1. How will request assist in achieving Department Goal and benefit the customer

A water tender is used to supply large quantities of water to a fire incident when hydrants are not in the area or in a wildland scenario when water is not available. Our tender requires pump upgrades in order operate independently on an incident as a tender\initial attack apparatus. The utilization of a "tactical tender" allows crews the ability to respond with 2200 gallons of water and the capabilities to make a significant impact on fire growth. The necessary upgrades include repairing the pump, adding a hose reel, bumper mounted nozzle, and foam capabilities. The goal is to extend the lifespan and use of the tactical tender with the upgrades

2. What specifically is needed to achieve this goal?

The Water tender was purchased in 2001 to provided water supply to areas that do not have adequate hydrant spacing for fire suppression. Those areas are becoming fewer and the use of the tender in that capacity has decreased. This apparatus was on the CIP replacement schedule in 2021, but was delayed with the hope that the pump being refurbished and additional improvements would increase use and longevity.
