

# **WINTER STREET CLEANING**

## **Winter Cleaning Procedures**

City cleaning crews will follow the Winter Street Cleaning Priority Routes identified on the maps included within this plan, "Streets Operations & Maintenance Division Administrative Rule No. 2," and in accordance with Air Quality Rule 8.303 shown below.

8.303: "Between December 1 and March 31, when the paved road surface is above 32°F for longer than 4 hours, political subdivisions shall clean the center line and areas immediately adjacent to the travel lane of any major arterials they maintain inside the area of regulated road sanding materials."

Priority 1 routes will receive cleaning first. If Priority 1 streets have been swept within one (1) week prior to the most recent above-freezing interval occurrence, then sweeping can proceed according to the next priority.

During the month of March, the City will clean all the Winter Street Cleaning Priority 1 and 2 routes identified in the Street Winter Street Cleaning Map before proceeding to clean all nonpriority routes.

Refer to the maps, street listings and checklists described in Appendix N of this Plan.
