1. How will request assist in achieving Department Goal and benefit the customer

The City has a loan program available that can be used to finance connections to the sewer system. The City also has a loan program to finance repairs to a customer's water service line but no such program exists for sewer service line repairs. The City has received a number of requests from customers for this type of program for sewer. This program would help low income customers to make necessary sewer repairs which could prevent costly sewer line backups and to prevent sewer discharges to the aquifer from broken pipes.

2. What specifically is needed to achieve this goal?

This request will provide initial funding to the sewer loan program in the amount of \$25,000. Further investments will likely be required in the future
